

PYLAM PRODUCTS COMPANY, INC.

Providing Color To The World.

Pylam Products is dedicated to delivering the right dye product for the right application - on time, every time. Each dye will meet our strict quality standards, each customer will be satisfied with our exceptional service, and each product selection will attest to our vast industry experience.

EXPERIENCE

Providing consistent product quality and expertise to get the job done right.

Pylam Products Company is an 89 year-old firm that started in a little five thousand square foot warehouse in the heart of Manhattan. For more than eight decades Pylam has been the unseen palette that has given just the right color to thousands and thousands of products worldwide.

Now located in a 46 thousand square foot facility in Arizona, more than 10,000 customers look to the Pylam staff to work closely with them on their formulas to achieve the highest level of chemical compatibility. Every Pylam staff member has many years of experience working with various formulators, ensuring that the dyes selected are appropriate and provide lasting color and functionality in whatever the final product may be.

QUALITY

In many cases, the dye needed to provide the correct color for a product is not simply an inert compound that provides hue. When dyes are chosen incorrectly, the product base may alter the stability of the color. Perhaps color may be the right shade on the first day, but completely wrong a week or a month later due to chemical changes.

However, when you choose Pylam for your industrial dye requirements, you get a highly experienced color and chemical consultant who will guide you through your dye selection and testing. Our dyes are formulated to a pre-set standard to ensure product consistency. Your Pylam consultant will help you make sure your product, with its new color, gets to the marketplace to accomplish the mission intended.

PYLAM PRODUCTS

Chemical Specialties / Household Products:

Maintenance and cleaning products require stable dyes in many different situations. Pylam can supply your company with the right dye for countertop cleaners, window cleaners, or whatever chemical specialty your company manufactures. We can also assure you of finding the appropriate color that matches your specific requirements.

Petro Chemicals:

Product color-coding is used by many industries so consumers can discern certain products from others. Lubricants and oils, for example, are color-coded for product applications. Pylam has the knowledge and expertise to provide you with the exact industrial dye you need.

Plastics:

Dyed plastics, such as red taillight covers on cars or bright green holiday plastic wrap, are made possible with Pylam. We supply the right shade of red to car companies, and we'll provide your company with the perfect hue for your plastic products.

Personal Care Products:

From toothpaste to hair-color agents, Pylam can supply a full range of color additives for all of your personal care product needs. Personal care

product dyes must be specially considered as they may come in contact with sensitive parts of the body, like the eyes, mouth or skin. With the expertise of the Pylam staff, you can expect a perfect and safe shade of rose or mint green.

Inks:

Pylam provides dyes for inks – like the ones in markers, highlighters, and ballpoint pens. Whether you need the right shade of bottled ink to be used with a fountain tip pen, or a just right neon pink for your best-selling highlighter, Pylam can direct you to the right dye everytime.

Adhesives:

Many adhesives are dyed for identification, such as industrial glues, and some just for fun, like colored glues for kids. Pylam dyes are used to color all kinds of adhesives, and our experience is used to get you the right dye the first time around.

Candles:

Taper, votive, container, or even floating candles...whatever your specialty, Pylam supplies dyes for all types that will withstand heat and temperature changes during burning. From soft to bright tones to the latest shade of decorative interior candles, we'll find just the right candle dye in the shade you need.
